

# AWS - César Jiménez Laguna

## 1. Web estática formato currículum con S3 y CloudFront

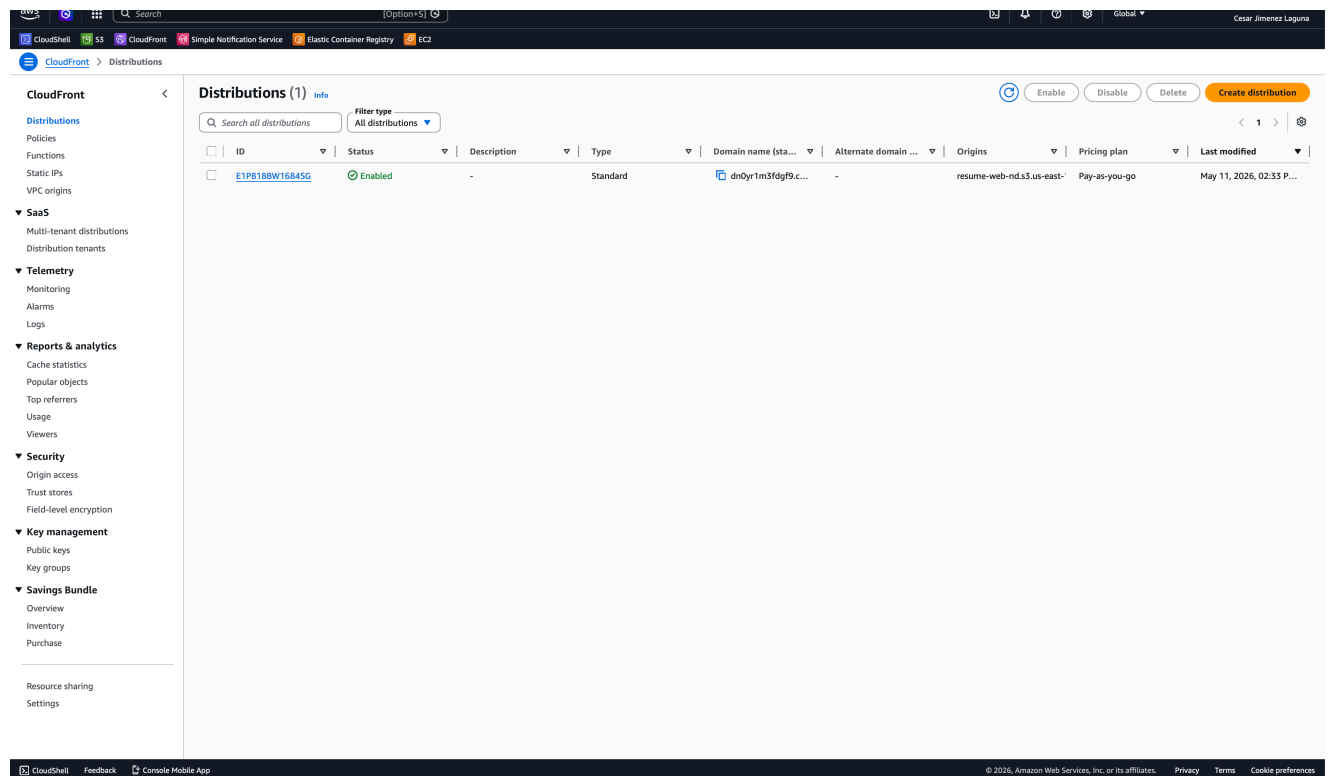

### 1.1 Creación del bucket en S3

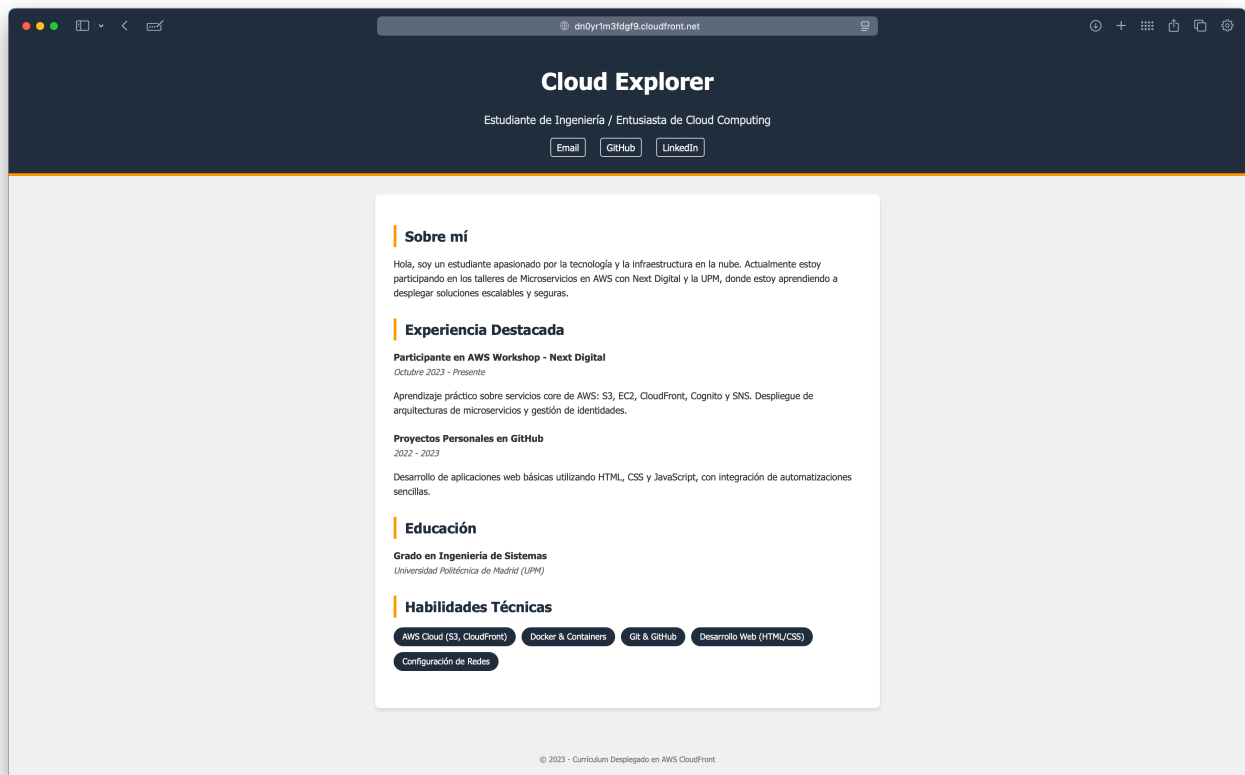

#### 1.1.1 Contenido del bucket (index.html)

## 1.2 Creación de la distribución en CloudFront

## 1.3 Contenido de la Web

## 2. Configuración de Amazon Cognito

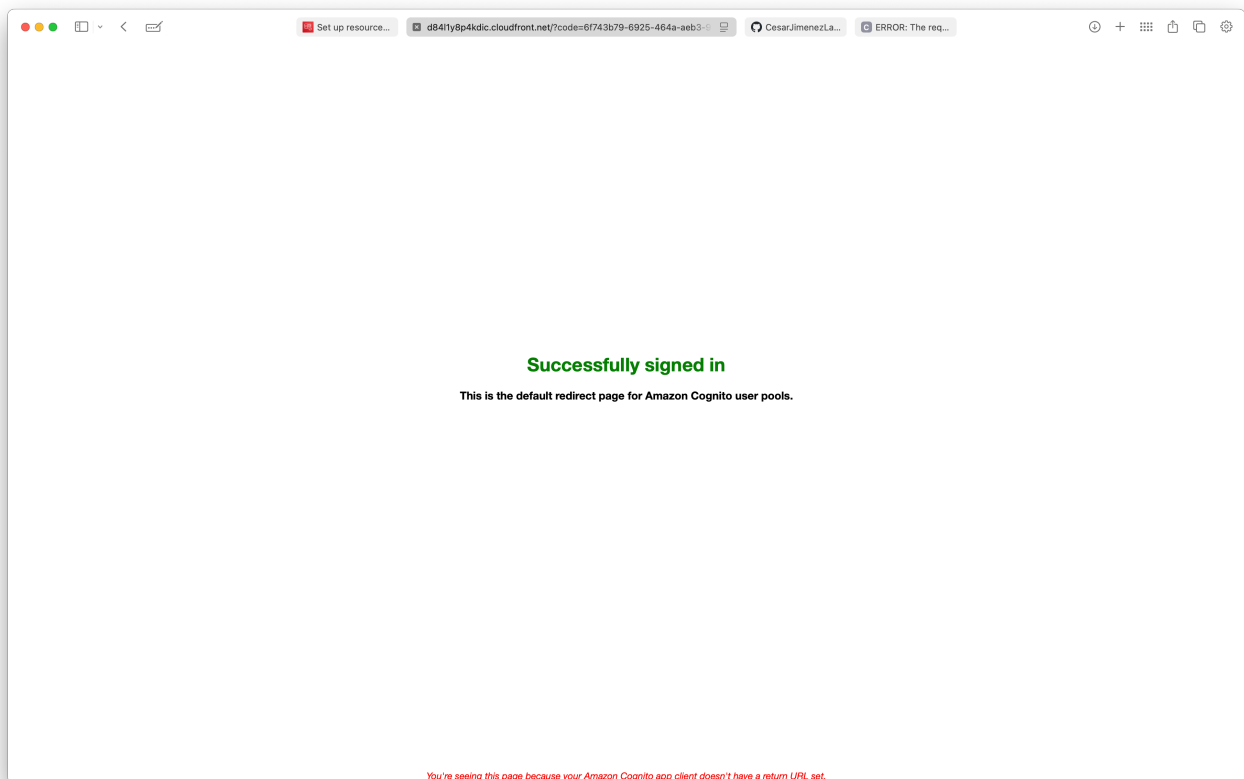

### 2.1 Creación de la pool de usuarios

The screenshot shows the Amazon Cognito console interface. On the left is a navigation menu with sections: Applications, User management, Authentication, Security, Branding, and Settings. The main content area is titled 'Overview: User pool - gbirkb'. It contains a 'User pool information' card with details like 'User pool name', 'User pool ID', 'ARN', 'Token signing key URL', 'Created time', 'Last updated time', 'Estimated number of users', and 'Feature plan'. Below this is a 'Recommendations' section with six cards: 'Set up your app', 'Apply branding to your managed login pages', 'Detect risks and protect users', 'Set up passwordless sign-in', 'Set up MFA', and 'Add sign-in with social providers'. The bottom of the page has a footer with 'CloudShell', 'Feedback', 'Console Mobile App', and copyright information.

### 2.2 Registrar usuario en Cognito

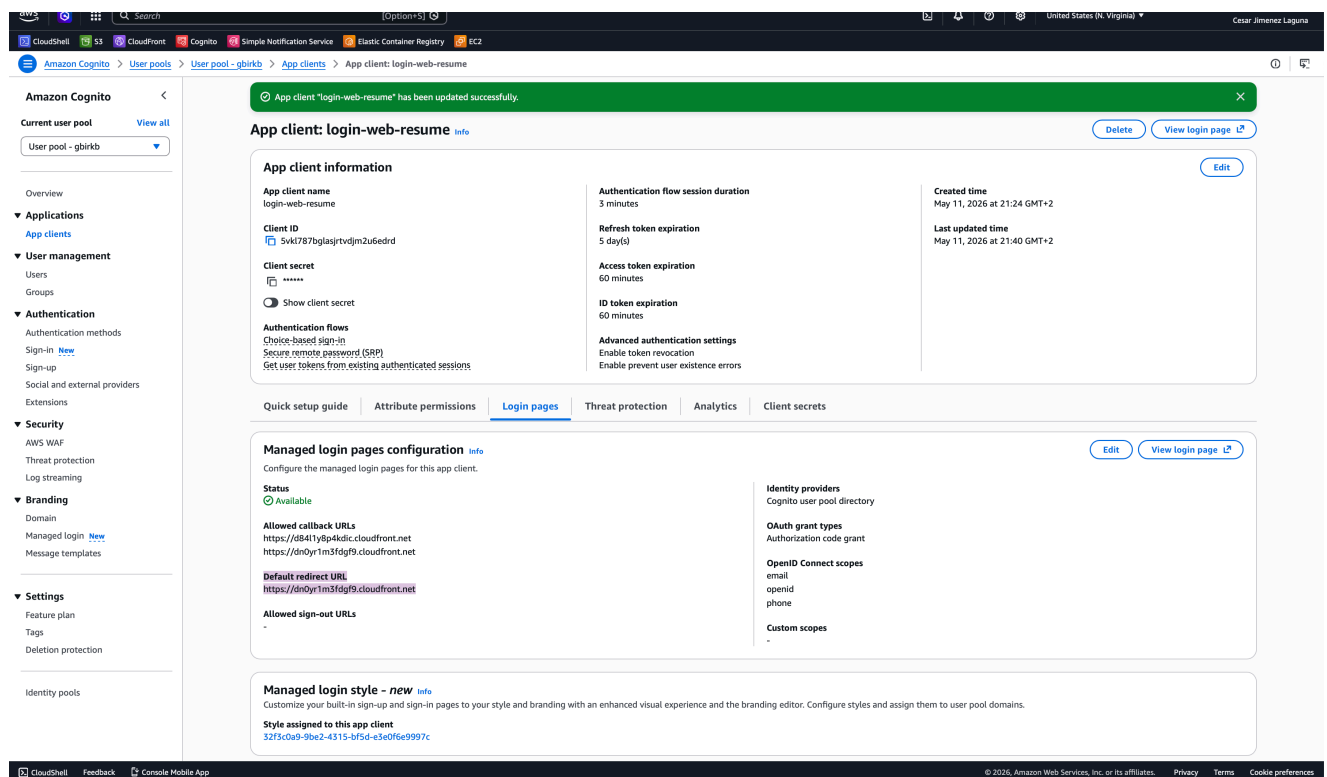

#### Configuración

The screenshot shows the 'Users' page in the Amazon Cognito console. It has a sub-header 'Users (1)' and a description: 'View, edit, and create users in your user pool. Users that are enabled and confirmed can sign in to your user pool.' Below this is a search bar and a table with columns: 'User name', 'Email address', 'Email verified', 'Confirmation status', and 'Status'. One user is listed with email 'hajefa7339@beziil.com' and status 'Enabled'. Below the table is a section for 'Import users (0)' with a description: 'View and create user CSV import jobs. Amazon Cognito can import users into this user pool from a specially-formatted CSV file. You can't import user passwords.' It includes a search bar and a table with columns: 'Job name', 'Status', 'Imported users', 'Skipped users', 'Failed users', 'CloudWatch logs', and 'Created time'. A message states 'No user import jobs found' with a 'Create import job' button. The bottom of the page has a footer with 'CloudShell', 'Feedback', 'Console Mobile App', and copyright information.

## 2.3 Redirección a la web creada tras realizar el log-in

### Configuración URL de redirección por defecto

## Funcionamiento de la redirección

El video se puede encontrar en el repositorio de [GitHub](#).

The screenshot displays the Amazon Cognito console interface. At the top, a green notification bar states: "App client 'login-web-resume' has been updated successfully." The main content area is titled "App client: login-web-resume" and includes several tabs: "Quick setup guide", "Attribute permissions", "Login pages", "Threat protection", "Analytics", and "Client secrets". The "Login pages" tab is currently selected, showing the "Managed login pages configuration" section. This section includes a "Status" indicator (Available), "Allowed callback URLs" (https://db411y8p4kdc.cloudfront.net and https://dn0y1m3fdg9.cloudfront.net), "Default redirect URL" (https://dn0y1m3fdg9.cloudfront.net), and "Allowed sign-out URLs" (-). To the right of these settings, there are sections for "Identity providers" (Cognito user pool directory), "OAuth grant types" (Authorization code grant), "OpenID Connect scopes" (email, openid, phone), and "Custom scopes" (-). The left sidebar contains navigation options for "Amazon Cognito", "User pools", "App clients", "User management", "Authentication", "Security", "Branding", and "Settings". The bottom of the screen shows a video player interface with a progress bar at 0:00 / 0:03 and a "Managed login style - new" section.
